Profile Summary

Product designer with experience across enterprise tools, financial services, e-commerce, and digital products. My work focuses on understanding how people navigate complex tasks and making those experiences clearer and easier to use. I bring a foundation in visual design alongside hands-on UX research, workflow design, prototyping, accessibility, and reusable design systems.

Core Competencies

- **Product & UX:** User research, interviews, usability testing, research synthesis, information architecture, journey mapping, user flows, wireframes, interaction design, high-fidelity UI, interactive prototyping.
- **Systems & Delivery:** Design systems, Figma components and variants, reusable templates, responsive design, accessibility, WCAG principles, developer handoff, design documentation, stakeholder presentations.
- **Tools:** Figma, FigJam, Miro, Dovetail, Figma Make, Antigravity, Adobe Photoshop, Adobe Illustrator.

Professional Experience

Experience designer @ Best Buy

JULY 2026 – PRESENT

- Search & Product Discovery: Audited Product Listing Pages across App and Small View to identify inconsistent spacing, dividers, and content separation. Developed reusable Figma slot templates and layout guidance; the approach was approved by stakeholders as the standard design direction.
- Defined module-specific spacing rules and a Select → Swap → Review workflow to help designers build PLPs consistently without reconstructing layouts from scratch.
- Worksite: Designing appointment-detail experiences for field agents across delivery, installation, repair, and pickup workflows, organizing information and actions around each appointment stage.
- Collaborate with product partners, business stakeholders, and engineers; work within the Brix design system and document decisions for design and development handoff.

User Experience Designer (G5 – Lead Responsibilities) @ Fidelity Investments

JAN 2026 – JULY 2026

Promoted to Grade 5 in recognition of leadership, product ownership, and contributions to enterprise accessibility initiatives.

- Worked on modernizing a 20+ year-old trade compliance platform, designing complex workflows, information-heavy interfaces, and data visualizations.
- Planned and moderated user interviews and usability tests; used findings to identify workflow issues and inform design decisions.
- Created user flows, wireframes, and interactive prototypes; developed and maintained reusable UI components and design-system guidance.
- Designed and prototyped an internal sports championship website with Figma Make; partnered with developers who implemented and launched it.

Associate User Experience Designer @ Fidelity Investments

JAN 2024 – DEC 2025

- Designed enterprise application experiences from research and workflow mapping through wireframes, high-fidelity UI, and prototypes.
- Conducted interviews and usability evaluations to understand existing tasks and pain points; reviewed designs with product and engineering teams.

Associate Graphic Designer @ Fidelity Investments

MAY 2021 – DEC 2023

- Created digital communication materials and visual assets, focusing on clear layouts, typography, and brand consistency.

Art Director / Graphic Designer @ Langoor Digital

JUL 2019 – MAY 2021

- Designed websites, landing pages, digital campaigns, and brand experiences; later led visual direction and collaborated with creative and development teams.

Selected Project Experience

Secure Trade Compliance Platform (STCP) | Fidelity Investments
Enterprise UX · Financial Services · Research · Data Visualization

Helped modernize a legacy trade compliance platform by studying complex user workflows and designing clearer information structures, data-heavy interfaces, and visualizations. Research and usability testing informed the design decisions.

Search — PLP Slot Templates | Best Buy
Design Systems · E-commerce · Responsive Layouts

Turned a PLP consistency audit into a stakeholder-approved, reusable slot-template approach. Focused on App and Small View, with module-specific spacing rules, designer guidance, and development handoff documentation. Large View exploration is ongoing.

Worksite — Appointment Detail Experience | Best Buy
Enterprise UX | Workflow Design | Information Architecture

Designing stage-aware appointment details for field agents across multiple service types, including delivery, installation, repair, and pickup. Work is in progress.

BU Super League 2026 | Fidelity Investments
0-to-1 Product | AI-Assisted Prototyping

Designed and prototyped an internal sports championship website using Figma Make; collaborated with developers through implementation and launch.

Education

Bachelor of Visual Arts (Applied Arts) @ Karnataka Chitrakala Parishath

2015-2019

Recognition and Leadership

- **FMRI Excellence Award — Inclusion Catalyst | Fidelity Investments**
  Recognized for contributions to inclusion and accessibility initiatives.
- **Indian Sign Language Community**
  Co-founded and facilitated an ISL learning community to promote accessible communication and inclusive workplace practices.
- **UX Mentorship & Accessibility Advocacy**
  Facilitated design critiques, knowledge-sharing sessions, UX workshops, and mentoring activities to strengthen design quality and accessibility awareness.
